Backroads App

- backroads-html - working html/css/javascript project (contains assets)
- working react application
  - navigate to the folder
  - run 'npm install'
  - once the dependencies are installed run 'npm start'

Create New React App

- install

```
npm create vite@latest
npm install
```

- run dev server

```
npm run dev
```

SRC Folder (boilerplate)

- index.js

```jsx
import React from 'react';
import ReactDOM from 'react-dom/client';

// styles (typically global)
import './index.css';

// convention to name it App and setup in a separate file
import App from './App';

const root = ReactDOM.createRoot(document.getElementById('root'));
root.render(
  <React.StrictMode>
    <App />
  </React.StrictMode>
);
```

App.js

```
function App() {
  return <h1>backroads app</h1>;
}

export default App;
```

- remove
    - remove logo.svg
    - App.css

Setup Structure

- public/index.html

    - change title
    - copy/paste font-awesome link (from html project)

- index.css

    - copy/paste css (from html project - css/styles.css)
    - error in line 209, just comment out for now

```
@media screen and (min-width: 768px) {
  /* .hero {
    background: linear-gradient(rgb(44, 174, 186, 0.7), rgba(0, 0, 0,
0.7)),
      url('../images/main.jpeg') center/cover no-repeat;
  } */
}
```

- src folder
    - copy/paste images folder (from html project)
    - move favicon.ico to public
- App.js
    - refactor to <React.Fragment>
    - copy/paste all the content within body tags, up to
